

## CORE COMPETENCIES

### Data Modeling

We specialize in advanced data science and analytics, delivering tailored solutions by working closely with clients to understand their unique data needs. Our expert team leverages artificial intelligence, statistical models, machine learning, and big data techniques to turn perspectives and questions into actionable results.

### Software/Application Development

We design, develop, and deploy custom Business Intelligence solutions and reporting systems based on an agency's specific requirements using the latest technology.

- Database Design and Development
- Data Warehouse Design and Implementation
- Web Application Design and Development
- Mobile Application Design and Development
- Dashboard and Portal Solutions
- Automated Workflow Design and Implementation

## DIFFERENTIATORS

- With our proprietary platform, we can customize a cloud-based BI solution allowing you to start experiencing value in as little as ten days.
- We prioritize customer satisfaction and ensure quick issue resolution on the same day.
- Our team is composed of highly qualified professionals with top university degrees and excellent industry experience.
